 Venue: Green Technology Hub, Hall 3, AsiaWorld-Expo, Hong Kong
 Language: English
 Remarks: Free Admission

15:30	<p>Introduction Mr. Milan Vágner – Consul (Trade & Economy), Consulate General of the Czech Republic in Hong Kong</p>
15:45 – 16:00	<p>Advanced Materials - JTJ Mr. Daniel Butler – International Marketing</p> <p>Company background:</p> <p>Founded in 2003 Advanced Materials-JTJ is a Nanotechnology company that has brought a number of technologies to the market, and continues now with FN NANO®, the strongest and most affordable air remediation tool, that uses the power of UV light and inert Titanium Dioxide in the world's most efficient photocatalytic coating.</p> <p>This simple and economical environmental solution can dramatically change the quality of life indoors by providing safe air for family or employees, ridding the air of chemicals, bacteria, particle matter, and much more. On building exteriors, the same qualities and self-cleaning ability will triple the lifespan of your painted and insulated surfaces, even rock and brick, so much so that there is no better surface sustainability enhancement you can use.</p> <p>Advanced Materials-JTJ seeks to clean the environment and provide a healthier future for everyone.</p>
16:00 – 16:15	<p>Silvaplana SE PhD David Damaska - CEO</p> <p>Company background:</p> <p>SILVAPLANA SE is a universal European company specialized in design and trade. It was founded in 2011. The company strives to help its clients achieve their goals with maximum respect for the environment</p> <p>Within the scope of the company's growth to foreign countries, the technology of mobile barriers EKO-SYSTEM will be launched to the dynamic Asia market. These barriers can become part of a flood protection system or function as preventive protection for buildings and places potentially threatened by an environmental disaster.</p> <p>The mobile barrier technology ECO-SYSTEM includes compact storing and useful solutions for implementation of this technology into civil protection systems for various protected areas</p>

16:15 – 16:30

SOLBIEN plc
TBC

Company background:

Solbien designs and provides technological **solutions for waste treatment** resulting in turning waste (green waste, animal manure, food waste, sludge from wastewater treatment plants, undersized fraction, etc) into a valuable end product – compost or biofuel. Our solution is **fast, reliable and energy efficient**.

Our unique approach enables us to accommodate a wide range of customers. We pride ourselves with providing a tailor-made solution to every customer taking into account their individual needs.
