

Eco Expo Asia 2024

Fostering Green Innovations for Carbon Neutrality

Green tips (for exhibitors)

Booth set up and decoration

- **NO FOAM BOARDS** for the production of exhibition materials and adoption of environmentally-friendly display materials which can be recycled, reused or upcycled (please make reference to Appendices 1 & 2).
- Adopt reusable exhibition materials as far as possible.
- Avoid or reduce using excessive packaging materials and decorations.
- Use natural decorative materials such as green plants.

Promotion

- Go electronic, avoid/reduce printed promotional materials and one-off publicity materials that cannot be reused.
- Avoid producing and distributing excessive souvenirs, and may replace them in electronic form, such as e-coupons.
- Not to use or distribute disposable plastic products as promotional materials (e.g. inflatable cheer sticks, balloon sticks, plastic-packaged tissue paper for promotional use, etc.).

During the exhibition

- Not to provide any form of shopping bags or plastic umbrella bags to participants.
- Minimise the distribution of unnecessary printed materials to the participants.
- Bring your own reusable cups/water bottles and tableware.
- Encourage staff working an event to bring their own meals, or schedule meal breaks outside instead of ordering takeaway. Participants should be encouraged to reduce food waste at source.

After the exhibition

- Recycle or donate the spent materials.
- Make good use of the recycling facilities and recycle right.
- Record the quantities of unused materials for better estimation of the required quantities of materials for next year to avoid wastage.
- Take back all materials for future use to achieve “Zero Waste”.

Please refer to the Green Event Guidebook by visiting the weblink below for more information: <https://www.wastereduction.gov.hk/en-hk/waste-reduction-programme/greening-your-events>
